**Analiza subculturii – istoric și propunere de  
abordare teoretică**  
**Subcultural Analysis – A History and a Proposal  
of Theoretical Approach**

**Abstract:**

This paper aims to present a critical reading of the most important works on subcultural analysis. After taking in consideration the contribution of the authors cited to the development of the field, we propose a theoretical model that can be used when analyzing subcultures that developed in Romania, a model that is based on Bourdieu theory on taste and art production.
