

## Deconstrucție și utopia / Deconstruction and Utopia

**Abstract:**

This paper presents the articulations of the two strategies to deconstruct the utopic imaginary. The fictional one through which is intended a demounting of the scaffold of perfect societies produced by the constructive utopia and are pointed out the evil consequences derived from actions inspired by utopia. The theoretical one which attacks the rationality criteria of actions practiced by utopical programs. We bring forward antiutopian arguments found both in literary masterpieces (AL Huxley, G. Orwell) as well as in important critical studies (K.R. Popper, A. Toffler).
