**Procreerea asistată medical PAM sau alternative în  
tratamentul sterilității / Medical Supported Procreation or  
Alternatives in the Treatment of Sterility**

**Abstract:**

Medical supported procreation cause new medical, ethical and moral problems. The Church in general rejects the reproductive technologies, but the legislation vary in different countries. When medical and surgical cases are not solved, the sterile couples can consult a specialist in infertility. There are different solutions which can be indicated by the medical doctor: fertilization in vivo and in vitro, the surrogate-mother etc.
