Protecția ca formă de integrare a copiilor romi / The Protection as Form Of Integrating of Roma Children

Abstract:

Roma children need to be integrated in today's Romanian society as well as they need to be offered with equal chances to a normal life. This paper shows some aspects of the discrimination Roma children are subjects of, but also the necessary steps took for their integration - both legal and moral. By protecting them and giving them the same chances (or even more) that Romanian children have we can hope to successfully integrate them in our society which will finally will be both our gain as well as theirs.
